

Newts

To Clean:

1. Clean cage once a week.
2. Use distilled water only!
3. Take out newts and place them in a bowl of distilled water.
4. Rinse out the cage and rocks.
5. Fill the cage a quarter full with water. Put newts back in and close the lid.

To Feed:

1. Feed twice a week.
2. Feed a very small amount of frozen bloodworms.
3. Cut a small piece from a cube, only a few drops, place in the water.

* You can pick up the newts, but don't keep them out of the water too long!
