

## Tarantula

1. Make sure the water container is full.
2. Feed the tarantula 1 cricket/week.
3. Make sure the peat moss is moist but not flooded.
4. Make sure the hiding pot is facing away from people.
5. When cold, turn the heater and/or the light on.
6. After the tarantula molts:
  - ~ it will be white
  - ~ it will not move
  - ~ make sure there are NO crickets in the cage.
  - ~ do NOT touch the tarantula for at least a week.

Thanks, and have fun.
