

## Teddy Bear Hamster

---Change the cage once every week.

1-Take everything out of the cage, including the hamster.

2-Throw away all the shavings in the cage.

3-Refill the food and water bottle, but only use tap water.

4-Fill the cage with shavings again, about the same amount.

5-Put everything back in the cage, including the hamster.

6-Put the lid on.

7-Please tape both sides of the lid with masking tape.

8-If you would like him to roam your home, you can put him in his ball, but be sure the ball is closed and he can't roll down any stairs.

## A Little Extra

1. He loves to be held and played with so you can take him out a few times a day and play with him.

2. You can give him raisins or carrots as treats.

3. Make sure he has a chewing stick. It helps him keep his teeth short which allows him to eat.
