

Tree Frog Instruction

1. The tree frog needs it light on all the time
 2. Mist the cage every day with a spray bottle to keep the dirt and sides of the cage moist.
 3. Change the water in the dish once a week and make sure it has enough water.
 4. Feed the tree frog a cricket on Monday and Friday if he doesn't eat it right away don't worry.
 5. Take the tree frog out every week and clean its cage by wiping the sides with a wet paper towel NO soap.
(the best way to get the tree frog out of his cage is by coaxing him and cupping him in your hands. Place him in a container with a lid.) Be careful he likes to jump!
- ** If possible use water, which is dechlorinated. To dechlorinate the water, let it sit in an open container for 24-48 hours.
