

## Water Turtle

### Feeding:

1. Feed a small to medium handful of Float Sticks twice every week.

### Cleaning:

1. Siphon the cage out once a month or when needed, and replace it with new **de-chlorinated** water.
2. Once a week you need to add about half a gallon of de-chlorinated water to the tank. The tank should always be a little over half full.
3. Keep your hands away from his face!!! When picking him up, hold onto his shell near his hind legs.
